AUSTIN Lamppost Banners

> Lamppost Banner Locations

- > Bridge: CONGRESS AVENUE, FIRST STREET & S. LAMAR
- > Downtown: CONGRESS AVENUE
- > Downtown: CONVENTION CENTER
- > Downtown: CITY HALL & SECOND STREET & CESAR CHAVEZ STREET
- > Downtown: DOWNTOWN
- > Downtown: REPUBLIC SQUARE

Republic Square

Located in the historic heart of Austin, the Republic Square district is a vibrant hub of community and culture. This district encircles the iconic Republic Square Park, a favorite local gathering place known for its lively farmer's markets and public events. The Republic Square district is currently comprised of (7) lampposts that can hold (7) 32" x 90" banners, but **additional poles are coming soon which will bring the total to (27) lampposts that can hold (32) 32" x 90" banners.**

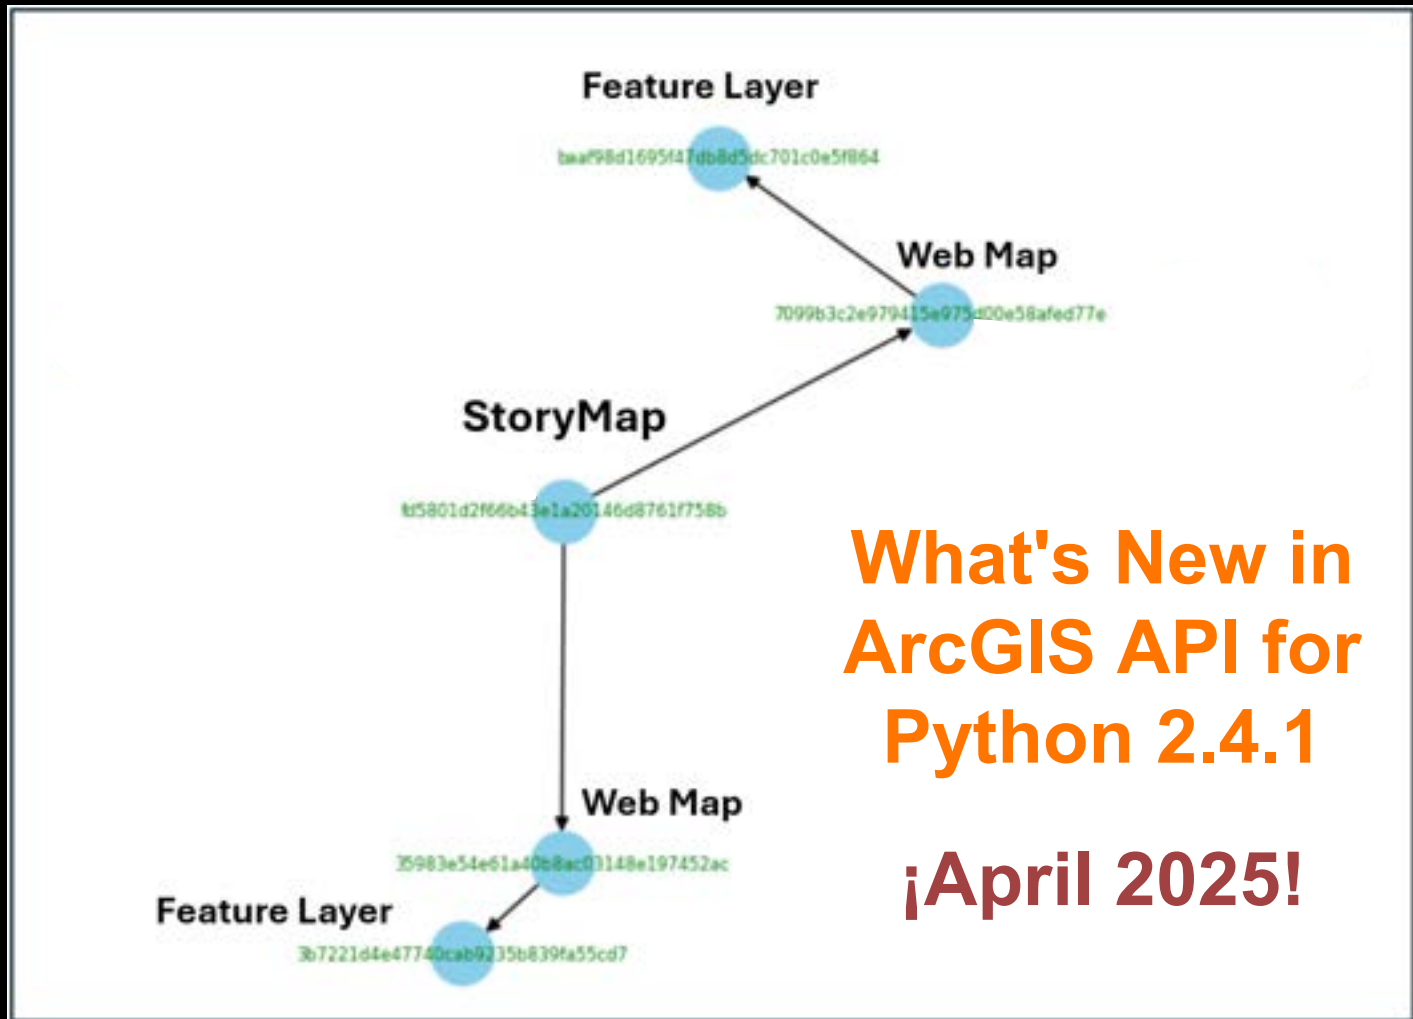

- > Downtown: W. SIXTH STREET
- > Downtown: E. SIXTH STREET & RED RIVER STREET
- > Downtown: SEAHOLM
- > East: E. ELEVENTH STREET
- > South: BARTON SPRINGS ROAD
- > South: RIVERSIDE DRIVE
- > South: S. LAMAR BOULEVARD
- > South: SOCO (SOUTH CONGRESS AVENUE)

arcgis.apps.itemgraph module

arcgis.apps.itemgraph module

Creates an ItemGraph from a list of items. The function recursively explores the dependencies of each item that is part of the organization, encompassing the full dependency tree of each source item.

Nearmap loading solution for web maps

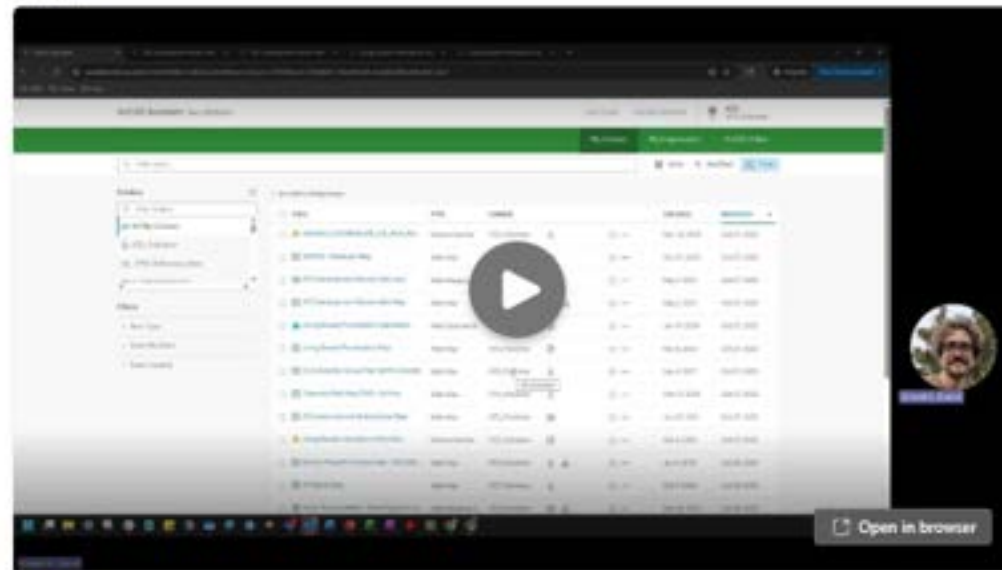

How to remove Nearmap from web maps that won't load.

AGOL First and foremost, I want to give [Hardy, Allison](#) credit for pointing me to this solution. Thank you Allison!

Howdy everyone, so recently with the AGOL update there is a major problem with Nearmap not loading in web maps, and because it won't load it is causing errors with web applications. But also, it won't allow us to make changes to and save web maps. But we have found a temporary workaround. In this video I show how we can go into the backend code of a web map and remove Nearmap entirely. This doesn't fix Nearmap, but at least for the time being it will allow web apps to load and for edits to be made to web maps.

In the video I reference a link for ArcGIS Assistant. There are two websites for this, so (PLEASE) use this link: <https://assistant.esri-es.com/>
